**Ajay has just arrived at Joe's house before school. Joe's mother is the warden who looks after the local park.**

# The Park

Ajay was just about to tuck into his tea and toast dripping in sour rhubarb jam when there was a loud clatter from the letterbox as an important-looking brown envelope landed on the mat. 'Bit early for the post isn't it?' Mum said. 'Ooh, it says Special Delivery.' Mum opened it, and unfolded the letter.

Joe knew instantly that something was wrong. He could see it on Mum's face. 'What is it, Mum?' Joe asked.

'Yeah, Mrs P, what's happened?' Ajay asked too.

'It's the park… they've shut it down.'

For a second no one said a word. Joe and Ajay looked at each other, then back at Joe's mum. Her face was pale, her jaw dropped open. She stared at the letter, her eyes watery and ready to spill over with tears.

'Shut the park!' Joe said furiously. 'They can't do that, it's… it's the park!!'

'Yeah, everyone loves that place!' Ajay joined in.

'You boys best get to school, or you'll be late,' said Mum, her voice all shaky.

'But what about…?' Joe started to say.

'You leave that to me, I don't want you worrying.' Mum tried to smile, but it didn't reach her eyes. If she was trying to reassure Joe, it wasn't working. He knew his mum needed that job – how else was she supposed to put sweet-and-sour spaghetti on the table?

'Don't worry, Mum, I'll… I'll think of something.'

Joe's mum just nodded, turning away to wipe her eyes.

UNDER DEV OPMENT
This notice hereb
St George's Park i
immediate effect ar
1st of July, this park will be
redeveloped and a new block
luxury flats will be built
– The Department of Progr

Joe and Ajay grabbed their bags and reluctantly headed out of the door. Neither of them said anything for what seemed like ages.

'You all right, man?' Ajay asked, breaking the silence.

'I don't know... I can't believe they've closed the park. I mean, why?!' Joe said in disbelief.

'Dunno,' Ajay shrugged. 'But I know a man who might,' he said, pointing down the road.

As they turned the corner at the top of Joe's street they saw a man in the distance. He had a ladder and toolbox and was busy hammering a sign into the park gates. This made Joe's blood boil. If Mum had been there she would have given him what for – no one hammers anything into anything without her say-so first.

'Oi!' Ajay yelled, 'what are you doing?'

Joe read the sign: 'Under development.'

'What's going on?' Joe asked. 'Why have you closed the park?'

The man stopped what he was doing and shrugged. 'They don't tell me anything, I'm just the bloke who hammers things.'

Joe read the rest of the sign:

UNDER DEVELOPMENT
This notice hereby declares that St George's Park is closed with immediate effect and that, from 1st of July, this park will be redeveloped and a new block of luxury flats will be built
– The Department of Progress

Underneath the notice was a drawing of a posh building, tall and made of glass. It had pictures of smiling people chatting and drinking coffee outside. Joe and Ajay looked through the park gates and could already see diggers moving in, ready to tear the playground apart.

'This can't be happening,' Joe muttered, blinking back the tears. This was the place where he and Ajay hung out. Where they used to plot how they were going to become mega rich, and plan what to do if the world got taken over by zombies. This was the place where Joe and Ajay used to play football – or rather where Ajay would kick the ball and Joe would try to get out of the way of it before it hit him in the face. And now it was going to be turned into flats! Why wasn't anyone stopping this?

# Fact Sheet: About Bumblebees

**At the Bumblebee Conservation Trust, we are passionate about saving bees. Here is why.**

**Save our bees**

Bumblebees are among the most loved and familiar of garden insects. The sight and sound of them buzzing from flower to flower is an essential part of summertime, but sadly these fat, furry little creatures are struggling to survive.

At the time of writing, 24 bumblebee species are found in the UK, but unfortunately, in the last 80 years, two UK species have become extinct and others have declined sharply. In our modern world of paved gardens and intensive farming, our bumblebees find themselves hungry and homeless. The reason for this is simple and clearly visible: there are now far fewer flowers to provide bees with the pollen and nectar that they need to survive. But all is not lost – you can take action today to help save these hardworking pollinators. This fact sheet explains how.

**What's so different about the bumblebee?**

To most people, bees are instantly recognisable but there are distinct differences between the appearance and lives of bumblebees and honeybees. Bumblebees are larger and hairier than their cousins which makes them perfectly suited for colder climates. Bumblebee nests are small and they do not store large quantities of honey, so their extra furry coat allows them to venture out on cold days to collect pollen and nectar when honeybees stay inside.

**Don't 'bee' confused**

Don't confuse bumblebees with wasps. Bumblebees do not swarm and are not aggressive. Only female bumblebees can sting and they will only do so if they feel very threatened. Bumblebees will never interrupt your picnic or steal your sandwiches!

**Buzz pollination**

Only bumblebees are capable of buzz pollination. This is when the bee grabs the flower and produces a high-pitched buzz. This releases pollen that would otherwise stay trapped inside. Key ingredients in our diet such as tomatoes are pollinated in this way. Many other common foods such as beans and peas would also be harder to produce and much more expensive without British bumblebees.

**Did you know that bumblebees have smelly feet?**
Well they do and they're quite useful! After feeding, they leave a scent on the flower which lets other bumblebees know to avoid wasting energy landing – the flower will contain very little nectar or pollen.

**Things you can do to help**
Bumblebees help pollinate plants in more than one million acres of British gardens and the flowers they find can be a lifeline for them. No matter how small your garden, you can help to save the sound of summer by providing lots of bee-friendly flowers throughout the year. By 'bee-friendly' we mean flowers that are rich in pollen and nectar. Many ornamental plants that are commonly found in British gardens, such as pansies and begonias, are of no value to wildlife. These decorative and colourful flowers often produce little pollen or nectar. However, there are hundreds of beautiful flowers that do offer these rewards, including foxgloves, lavender, geraniums, herbs and wild roses that you can add to your garden.

**Why not try planting these?**

Geranium

Lavender

Wild rose

**Energy drink for bees**
If you find a stranded or sleepy bumblebee, you can help to boost its energy levels with a simple sugar and water mix. Mix equal parts white sugar and warm water then pour into a small container or sponge. Place both the bee and the artificial nectar near to some flowers.

**Act now**
You can also help by supporting our work to conserve bumblebee habitats and raise public awareness. There are various ways to show your support including volunteering, fundraising and becoming a member of the Bumblebee Conservation Trust. For more information on all of the above, including access to our Bee Kind gardening web page, visit: **www.bumblebeeconservation.org**
